AMP's first 10 years have seen monumental changes in every aspect of the music industry, every part of our culture.

And through the floods, the bombs, the twisters & the clutter, the Association of Music Producers has grown to nearly 100 member companies across the country. And we've led scores of initiatives that have improved

the working environment for all of us. We've even brought our clients into the process!

There's a lot to celebrate—and we'll be doing just that on May 8th at Hi Fi. So come on out and raise your glass with colleagues & clients alike. **RSVPs a MUST!**

**Special Note To Non-Member Companies:** You're invited too! The first 15 minutes of this celebration will be all about filling you in on what AMP is doing to make your business better. And that's what really rocks!
